COMMENT

Meeting Attended:

I was not able to attend a meeting

Important Issues:

Land Use (Agriculture, Residential, Recreation), Noise, Visual / Aesthetic Resources

Property Uses:

Residential

Comment:

- I-203-001** | This is to object strongly to the planned crossing of the Sangre Cristo Ranches area, where I am an owner , by the planned open air high voltage power lines. The whole area is a planned to be or become a recreational and residential area, where such pylons would represent a visual , safety and acoustic nuisance and risk. On the first item, and in my case, the property value would go down as view would be obstructed. On the second, the combination of air power lines and strong winds/ frost could lead to power lines falling on the ground, exposing people and wildlife. On the third item, at the chosen voltage and frequency, there would be a constant noisy buzz whenever humidity gets as it is in that area from fall to spring , with implications on residents in a 1 mile band, which is my case.
- I-203-002** |
- I-203-003** |
- I-203-004** |
- I-203-005** | The solution should be to bury the power lines along the main highway, as anyway those lines would not serve for power distribution to Sangre Cristo residents.
